B- Reading Comprehension (16 Ms)

-Read the following passage carefully, then answer the questions below:

A hat seller was going to the village market to sell his hats. He walked for a long time through the green forest and felt tired , so he decided to take a rest. He saw a tall tree. He sat under it and soon fell asleep. On the tree, lived many monkeys. They saw the man sleeping with a hat on his head . They all came down to see. They found a bag full of colourful hats next to him. Monkeys like to **imitate** what people do so, they took the hats and wore them on their heads just like the man. Then, **they** climbed up the high branches of the tree.

After some time , the hat seller woke up . He found his bag empty . All the hats were missing . he looked around , but he didn't find them . He was very sad. All of a sudden , he heard loud noises coming from above , he looked up and for his surprise he saw ten monkeys in the tree wearing his hats.

The hat seller wanted to get his hats back but the monkeys were too fast he couldn't catch them. An idea struck his mind. He , at once, took off his hat and throw it on the ground and all the monkeys throw their hats on the ground, too. Monkeys are good imitators. B- Reading Comprehension (16 Ms)**-Read the following passage carefully, then answer the questions below:**

Have you ever wondered what keeps a hot air balloon flying? It is when hot air rises and cold air falls. In order to understand more about how this works in hot air balloons, it helps to know more about hot air balloons themselves.

A hot air balloon has three major parts: the basket, the burner, and the envelope. The basket is where passengers ride. The burner is positioned above the passengers' heads and produces a huge flame to heat the air inside the envelope. The envelope is the colourful fabric balloon that holds the hot air. When the air inside the envelope is heated, the balloon rises. The pilot can control the up-and-down movements of the hot air balloon by regulating the heat in the envelope. When the pilot is ready to land, the air in the balloon is allowed to cool and the balloon becomes heavier than air. This makes the balloon descend.

Before the balloon is launched, the pilot knows which way the wind is blowing. But, sometimes the pilot can actually control the direction that the balloon flies while in flight. This is because the air above the ground is sectioned into layers in which the direction of the wind may be different. A hot air balloon can't be fully controlled, but the pilot can fly higher or lower into a different layer of air. Some days the difference between the direction of the wind is so strong that it can actually push the balloon in a completely different direction!

B- Reading Comprehension (16 Ms)

-Read the following passage carefully, then answer the questions below:

Are you an only child? Are you the oldest, the youngest or somewhere in the middle? Middle children are often good at making everyone happy. Unfortunately they are not usually rich. Often they are not well-educated and don't have a good job. They get less attention than older children, and less money and time are spent on them. Don't worry about being a middle child though - famous and successful middle children include Bill Gates.

The youngest children are often very creative. They are given lots of attention from their older brothers and sisters. So their games and entertainment are often more creative. Many youngest children have successful careers in journalism and sales. Lots of famous actors and actresses are youngest children.

The most successful children are only children and first-born children. More than half of all Nobel Prize winners are first-born. Also more people studying medicine, law and engineering are first born than middle or youngest. While middle children are easy-going, first borns are ambitious and **aggressive**. **They** are also often more intelligent.

So how can we explain differences? Well, first-born and only children have more attention. For only children, there is more money in a small family, so more money is spent on them. First-borns and only children are spoken to more like an adult and spend more time with adults. As a result, if the family has another child, the oldest becomes like another parent.

B- Reading Comprehension (16 Ms)

-Read the following passage carefully, then answer the questions below:

Twenty years ago, kids in schools had never even heard of the internet. Now, I will bet you cannot find a single person in your school who has not at least heard of it. The 'net' in internet really stands for network. A network is two or more computers connected together so that information can be shared or sent from one computer to **another**. The internet is a **vast** resource for all types of information. You may enjoy using it to do research for a school project, download your favourite songs or communicate with friends and family. Information is accessed through web pages that companies, organizations and individuals create and post. Anyone can put anything on the internet, so you have to be careful and use your judgment and common sense.

Therefore, you have to be sure that whoever posted the information knows what they are talking about, especially if you are doing research! If you are just emailing people, you still have to be very careful. If you have never met the person that you are communicating with online, you could be on dangerous ground! You should never give out any personal information to someone you do not know, not even your name! And just like you can't believe the information on every website out there.

B- Reading Comprehension (16 Ms)

-Read the following passage carefully, then answer the questions below:

A grizzly bear hunts for fish in the river. A black rhinoceros runs across the plains of Africa. These animals share the Earth with us. They fascinate us with their beauty and we love learning about their habits. But just loving them is not enough. These animals are endangered. Many of them are dying, and without special care, they may someday disappear from Earth.

Africa was once filled with plenty of wild animals, but not anymore. One of these animals, the black rhinoceros, is powerful and can be dangerous. However, its strength can't always help it to escape hunters. Many hunters kill rhinos for their valuable horns. This has caused the black rhino to be placed on the endangered species list. The elephant is also endangered and is killed for its ivory tusks.

Unfortunately, it is people who cause many of the problems that animals face. We change and pollute their habitats. We hunt them for skins, tusks, furs, and horns. We destroy animals that get in the way of farming or building. And we remove them from their natural habitats and take them home as pets. What can you do to help endangered animals? Make an effort to support zoos and wildlife groups. You can also be a smart shopper and never buy a pet that has been raised in the wilderness. If we allow even one species on Earth to die out, it affects other living things and changes our world.

B- Reading Comprehension (16 Ms)

-Read the following passage carefully, then answer the questions below:

Nowadays you can find fast food restaurants in almost every big city. Most people prefer fast food restaurants. Speed and price make them the favourite restaurants. Some people don't want to spend a lot of time preparing food. So, they can order what they want and eat it in about fifteen minutes. That's why they are called 'fast food restaurants '. The prices are also cheap because of the large number of meals sold every day.

People like to be comfortable and enjoy their food. The famous fast food restaurants like Hardee's make sure that a beef burger in Kuwait tastes the same as the one in New York and not different from the one bought in London. An example of fast food is beef burgers. They have too much salt, fat and spices. This mixture of fat, sugar and salt set off the pleasure chemicals in the brain. That is why people like having fast food. But, some people say that they are not good for health. They don't have the important food elements which our bodies need.

Food experts advise us not to eat tinned food because it is not fresh. Sometimes, fast food is not well protected from dirt, dust, and insects, especially flies. Such food doesn't also have enough proteins and vitamins. So, eating fast food every day leads to horrible fatness and causes many dangerous diseases like heart attacks and high blood pressure.
